DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed January 24, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. **Specifically, a copy of document numbers DE 3348370 and WO 03/061744 was missing from the information disclosure statement.**

The information disclosure statement filed January 24, 2005 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered. **Specifically, a concise explanation of the relevance of document number EP0009292 was omitted from the information disclosure statement.**

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3743

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 4, and 11-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Makiej, Jr. (U.S. Patent No. 5,002,048). Makiej discloses a unitary medicament dispenser device comprising a first medicament dispenser (18) for the delivery of the first medicament and at least one further medicament dispenser (20) for the delivery of the at least one further medicament. The first and the at least one further medicament dispenser enable the first and the at least one further medicament to be kept separate until the point of delivery (Fig. 1). The first medicament dispenser is different in type to the at least one further medicament dispenser (cols. 1-2).

Claims 5-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Weinstein et al. (U.S. Patent No. 5,830,490). Weinstein discloses the organizing, storing and coordinating the combined use of aerosol and oral medications, such as blister pockets and an aerosol (col. 2).
